

Talking Screen

For Windows 95/98/ME/2000 and XP
Product Specifications Sheet

Talking Screen for Windows is a powerful dynamic display software that can be easily programmed and customized.

Access Methods:

- Joystick
- Mouse or Mouse Emulator
- Switch
- Touch Screen

Speech Output:

- Talking Screen allows the user to use both digitized and synthesized speech.
- Talking Screen is compatible with a variety of speech synthesizers including DECTalk and E.T.I. Eloquence
- Users of Talking Screen can have entire messages pre-programmed to a symbol, or combine symbols to form new messages.

Symbol Features:

- Talking Screen includes a large library of symbols including many Mayor-Johnson symbols, as well as photographs
- Talking Screen can import digital pictures for use as symbols
- Talking Screen also includes a paint program to allow creation or editing of symbols

Adaptability:

- Talking Screen allows both pictures and text to be combined in a symbol to promote literacy
- Number and placement of symbols on a page are completely adjustable
- Symbols can be used play sound effects and movies along with the speech message
- Symbols can be displayed in pre-programmed groups the user can choose based on two criteria
- Talking Screen allows for color coordination, auditory prompting and magnification of symbols to aid in communication

Support and Upgrades:

- As with all of Words+ AAC software, telephone support and software upgrades are free and included in the price of the software
